

WOODFOLD RESIDENTIAL ELEVATOR ACCORDION GATES

Choose from five standard series, in your choice of finishes, plus many design options to fit the most unique requirements

240/Visifold Combination

240 Series

Visifold

Alumifold Solid

Alumifold Perforated

Every Woodfold accordion gate is custom made to your exact size & design requirements.

Woodfold Gate Features

- Any Width
- Heights to Ten Feet
- Two-week Manufacturing Time*
- High Pressure Laminates Offered
- Solid Aluminum Panels Available
- Special Hardware Available
- Custom Finishes Available

* See Shipping Schedule on page 2.

About Woodfold

We are an employee owned company, established in 1957.

Recognized as the industry leader, Woodfold's products reflect our experience in the manufacture of accordion doors and gates. Continuous improvement in the past and the future assures the owner, contractor and design professional of the best possible product.

Every Woodfold gate is engineered for strength with an exclusive hardware hinge system.

Woodfold Accordion Gate Panel Features & Options

Shown above are printed reproductions of Woodfold standard finishes. Please see your supplier to view actual sample before ordering.

Architectural Specifications

Residential Elevator Gate(s) shall be accordion-type, factory finished, with panels connected continuously along the top and bottom by a steel hardware hinge system. Individual hinges are to be riveted to those adjoining, and contain stops to maintain a uniform extended position. Extruded vinyl seals shall securely connect all adjoining panels top to bottom. Gates shall be suspended by nylon wheels from an aluminum overhead track. Bottom pins and lead post gib travel in floor guide (by elevator Mfg.). All necessary hardware and moldings shall be included for normal installation.

Note: To comply with ADA requirements, certain applications may call for specific handle location placement and accessible finished opening widths.

Unique Hardware Hinge System

The Woodfold top and bottom hardware hinge system eliminates the stretching of the vinyl panel connectors. Our roller system is riveted to the top steel hardware hinge system allowing doors to "stay put," whether in the stacked or extended position. This metal hinge system provides rigidity and strength while the partition or door is fully extended.

Hardware Hinge Colors

Clear finish supplied with Off-white, Chalk and Amethyst doors. Bronze finish supplied with all others. Gold available at optional cost.

Lead Posts / Visifold Side Channels

Vertical aluminum components are available in clear anodized, bronze, sand and white as standard, each is color coordinated with panel connector finish. Gold available at optional cost.

Panel Connectors (240 Series)

Color-coordinated, extruded vinyl, barbed and imbedded in saw kerfs in panel edges with special adhesives. Supplied as standard in the following colors: **White** with Off-white, Chalk and Amethyst vinyl. **Sand** with Hardwood Birch, Oak and Maple, and with vinyl Oak, Birch and Natural Oak; also with Tan, Tahiti and Rattan vinyl. **Brown** is supplied with all other vinyl or hardwood panels.

Guarantee

Woodfold Residential Elevator Gates are guaranteed against failure resulting from defective material or workmanship.

Shipping Schedule

All series with factory standard finishes, two weeks. Custom finishes, three weeks after color approval. All others, "check with factory."

Finish Selections

Natural Hardwood Veneers

Select grade veneers of four popular hardwoods are laminated to 1/4" MDF providing excellent dimensional stability. Factory finishing with sealer and protective clear lacquer top-coats minimizes moisture retention and increases panel stability. Standard hardwoods are: Birch, Oak, Mahogany, Walnut, Cherry and Maple. Custom stain finishes and exotic or special hardwoods are available with sufficient lead time. Contact our headquarters for more information.

Vinyl-Lam Woodgrains

Eight realistic appearing faux wood finishes are offered. Finishes are laminated to 1/4" medium density fiberboard providing excellent dimensional stability. Woodgrain finishes include: Birch, Natural Oak, Light Oak, Dark Oak, Pecan, Teak, Mahogany and Walnut. Light Oak finish is available with Class 1 fire-retardant core.

Solid Colors & Textures

Six vinyl finishes are offered. Off-white and Tan and multi-toned Chalk, Tahiti, Rattan and Amethyst textures. All are laminated to 1/4" MDF providing excellent dimensional stability. Chalk vinyl finish is available with Class 1 fire-retardant core.

Decorative Laminates

WILSONART Pionite **NEVAMAR**  High-pressure decorative laminates from all major brands may be specified. Please advise pattern number and manufacturer.

Acrylic Panels

Visifold gates feature 1/8" thick, transparent, clear or bronze-toned acrylic panels. Panels can be used alone or in combination with our other standard gate finishes. Other clear or opaque 1/8" thick panel options are offered by quotation.

Alumifold

Woodfold's Alumifold Gates incorporate our exclusive hinge system with aluminum frame side channels with clear finished anodized aluminum panels .080" thick. Offered in your choice of solid or perforated aluminum either can be used alone or in combination with the other for an aesthetically pleasing and secure elevator gate.
