Woodfold Accodrion Doors - LEED® for Building Design and Construction V4

LEED® (Leadership in Energy and Environmental Design) Green Building Rating Systems for New Construction, Core & Shell, and Schools are a set of performance standards for certifying the design and construction of commercial or institutional buildings and high-rise residential buildings of all sizes, both public and private. The intent is to promote healthful, durable, affordable, and environmentally sound practices in building design and construction.

Listed below are the LEED® Green Building Rating System categories along with information of possible LEED® credits that our Roll-Up Doors may contribute towards:

1. **Integrative Process.** This category does not apply to our product.
2. **Location and Transportation.** This category does not apply to our product.
3. **Sustainable Sites.** This category does not apply to our product.
4. **Water Efficiency.** This category does not apply to our product.
5. **Energy and Atmosphere.** This category does not apply to our product.
6. **Materials and Resources - MRC3 “Leadership Extraction Practices” Credit**
 - FSC Certified Wood. Currently no FSC paneling is available for our accordion doors.
 - Recycled Content
 - Steel components – Default 25% post-consumer recycle content.
 - Aluminum components- Default 25% post-industrial/pre-consumer recycle content (Sapa, Inc.).
 - Precise recycle content and weights of components can be provided once order is finalized.
7. **Indoor Environmental Quality – “Low-Emitting Materials” Credit**
 - Our wood panels are CARB compliant for formaldehyde.
8. **Innovation.** This category does not apply to our product.
9. **Regional Priority.** This category does not apply to our product.

Woodfold offers sustainable products, but just as important, we are a sustainable company and are proud to share our efforts. Please visit the following link
