

WOODFOLD

CRAFTING VALUE FOR MORE THAN 50 YEARS

CUSTOM ROLL-UP DOORS

WOODFOLD Custom Roll-Up Doors

What started as a small woodshop in Forest Grove some 50 years ago now stands as a testament to modern woodcrafting. Which means serious benefits for our customers in the form of product selection, development, design and value. Woodfold combines decades of craftsmanship with today's most advanced computers and machinery for an unsurpassed level of quality, efficiency and precision. And, this is just the beginning. After all, we're only 50 years old and that's quite young in our minds.

Consistency of Finish and Finest Hardwoods

While the woodcrafting process sets Woodfold custom Roll-Up doors apart, you'll also appreciate the consistency of our factory finish. Each piece is individually finished prior to assembly. Because all edges are sealed at our shop, they're also nicely protected against moisture problems. Using the finest natural hardwoods like oak, maple, birch, mahogany and cherry* allows us to apply rich, gorgeous finishes that truly bring out their stunning appearance. We can custom match our finishes to your existing millwork or décor. Additionally, the custom-building process allows for consistent, precise fits and tolerances.

Quality and Strength

Woodfold custom Roll-Up doors can be finished in clear lacquer, custom stains and/or paints. To increase strength and durability, each hardwood slat is individually attached with strong, plastic-coated, aircraft-grade stainless steel cables and fixed at top and bottom. Last, each Roll-Up door is installed and tested prior to shipping, then sent in durable crating, thus ensuring everything possible is done to have all pieces arrive undamaged.

**We can also build our Roll-Up doors in nearly any other hardwood you'd like. Call your distributor or our office.*

*The FSC logo © 1996 Forest Stewardship Council A.C. FSC Chain of Custody Certification Code SCS-COC-001663. **LEED is a registered trademark of the Green Building Council.

Benefits of Our Factory Finishing

Whereas other Roll-Up doors finished on the jobsite tend to suffer from unsightly missed coverage on the top, bottom and ends, Woodfold insists on individually finishing each piece prior to assembly. Factory finishing also prevents moisture build-up inside the wood, which leads to warping and can seriously hamper both the operation and the appearance of the door.

Architectural Specifications

Woodfold Roll-Up Doors shall be upward coiling, factory finished (unfinished available) with individual slats interconnected using plastic coated aircraft-grade stainless steel cable, fixed at top and bottom. Woodfold Roll-Up doors shall be suspended from manufacturer-provided overhead coiling system utilizing manual, awning crank, or electric motor driven operation. All necessary hardware and material shall be included for normal installation.

LEED® Credits & FSC Certification

Select FSC* certified hardwoods (subject to availability) may contribute toward LEED** credits or other green building rating systems.

The Woodfold Guarantee

All Woodfold doors are custom made to fit each opening and warranted against failure due to defective materials or workmanship.

Employee-Owned

You're assured a precise level of workmanship, service and long-term value with each order because every Woodfold employee shares in the success of a job well done.
